

目錄

Theme 1. Overview, Trend and Perspective of FRP in Civil Engineering

1. Overview, Trend and Perspective of FRP in Civil Engineering 1
Urs Meier
2. FRP Composites in Construction: Opportunities, Challenges and Design Guidance 20
Jin-Guang Teng

Theme 2. Design Codes and Guidelines of FRP in Civil Engineering

3. The Use of Innovative Composite Materials in Construction - A Highlight of Research and Code Development Activities in Canada 21
Moe M.S. Cheung
4. Progress and Development of FRP Civil Infrastructures in Japan 37
Kunitomo Sugiura, Itaru Nishizaki, Yasuo Kitane, Hitoshi Nakamura

Theme 3. Advanced Research Topics of FRP in Civil Engineering

5. Advanced Research Topics of FRP in Civil Engineering 53
Urs Meier
6. Experimental Performances of FRP Composites in Civil Engineering Structures: Self-Centering Brace, Bridge Deck, and Wide-Flange Beam ...71
Chung-Che Chou

Theme 4. Application of FRP Composites in Civil Engineering

7. FRP Composites Bridge Technology in the U.S. 81
Benjamin M. Tang
8. The application of composite materials on structural repair and reinforcement 88
Ching-Long Ong

9. The Application of Composite Shell System to Bridge Engineering	90
<i>Chung-Sheng Lee, Gilbert A. Hegemier and Jang Ho Lee</i>	
10. Long-term Experience with Applications of CFRP Composites in Civil Engineering in Switzerland	95
<i>Urs Meier</i>	
11. FRP Composite Decks for Bridges and Walkway/Bikeway Expansions in Korea	111
<i>Sung Woo Lee, Kee Jeung Hong and Sin Zeon Park</i>	
12. California Experience in FRP Composite Application on Bridges	117
<i>Li-Hong SHENG</i>	
13. Researches and Applications of Innovative Fiber Composite Structures...	119
<i>Wei Q. Liu, Hai Fang, Yuan Fang, Jun Wang, Yu J. Qi and Li Wan</i>
